AluChef

CATALOGUE

2020

FEATURES

Make your kitchen or buffet even more versatile and functional with AluChef aluminium cookware that has a non-stick coating.

In addition to being aesthetically beautiful, AluChef is essential for eliminating OH&S issues, operational issues and generally improving venue processes.

The cookware comes with tempered glass lids with a steam outlet and stainless steel edges that provide an even more efficient use, as it allows you to monitor the cooking process and in addition to protecting food in buffets displays.

MATERIAL

6.8 mm thick aluminum body that provides fast and uniform cooking.
 Internal and external organic nonstick coating. Greater anti-stick power; greater resistance to abrasion; greater durability; easier to clean and free of PFOA, ensuring abrasion resistance above 5,000 cycles..

INDUCTION COMPATIBLE

Versatility when preparing and keeping your food warm. AluChef pans have been carefully developed so that they are also compatible with induction equipment.

WEIGHT IN KG

*28cm Casserole with Lid

LIGHTWEIGHT

Aiming at practicality and safety when preparing and transporting food, AluChef pans are incredibly light compared to other pans on the market. Up to two times lighter compared to steel models and up to three times lighter compared to cast iron models.
